Ssekabira Robert Sims

SOFTWARE ENGINEER

I am robert sims a self taught Software Engineer with simple skills in the field of ict. I enjoy working with teams and people who are better than me in order to learn more good skills for my career and also contributing to different application projects. I use different technologies like Html, Css, Javascript, Typescript and React.js for building user interfaces and use Node.js, Express.js and MySQL for handling the backend server and building REST Apis and never the less i also use git for version control and github for handling repositories for my projects.
